- Research and apply new technology if require.
- Update and make edits according to new documents or issues provided by customers.

HIGHLIGHT PROJECTS**Tomaho Soft**

Project Description	Enterprise management software.
Position	Front-end Developer
Team size	~10 members
Responsibility	<ul style="list-style-type: none"> - Building software to manage multiple business processes and departments on a single platform. - Building accounting software that fully and flexibly meets accounting operations for most types of businesses. - Handle and fully support warehouse price calculation methods according to business type.
Technologies used	ReactJS, Redux-Saga, React-Hook, Style Component, Formik+Yup...

KingFood Mart

Project Description	Supermarket warehouse and goods management software
---------------------	---

Position	Front-end Developer
Team size	~20 members
Responsibility	Edit the interface and process logic about warehouse goods data. Updates add features to features. For example: Search,...
Technologies used	ReactJS, React-Hook, CSS , ...

FUJIA

Project Description	Banking System
Position	Front-end Developer
Team size	~33 members
Responsibility	<ul style="list-style-type: none"> - Requirement gathering and understanding - Develop application . - Update and make edits according to new documents or issues provided by customers. - Build a new interface for the project
Technologies used	ReactJS, Typescript, NextJs, Redux, Redux-React, Redux-Saga, React-Hook, Style Component, Formik+Yup, Jest Test ...

NEOHOP

Project Description	Hotel System
Position	Front-end Developer
Team size	~10 members
Responsibility	<ul style="list-style-type: none"> Implement Coding convert code VB to Angular Write Design Detail Write Test Case project

	Implement Manual Test
Technologies used	Angular , Typescript, Java, Postgresql, ...

KPI Management

Project Description	KPI Management System
Position	Full-stack Developer
Team size	3 members
Responsibility	<ul style="list-style-type: none"> - Implement KPI Management System using Vue 3 and Ant Design Vue -Develop multi-level KPI tracking and approval workflow -Implement formula-based auto-scoring calculation feature -Build real-time notification system with Socket.io -Create dashboard and analytics with Chart.js -Develop responsive UI components and forms -Implement role-based access control (RBAC) frontend -Write unit tests and integration tests -Optimize performance and user experience
Technologies used	Vue 3, Ant Design Vue, Vuex, Chart.js, Socket.io, TypeScript, JavaScript, ExcelJS

PORTFOLIO

Project Description	Portfolio
Position	Front-end Developer
Team size	1 members (Personal project)
Responsibility	<ul style="list-style-type: none"> -Designed and developed a personal portfolio SPA using Next.js 15, React 19, TypeScript, and Tailwind CSS, optimized for SEO and performance. -Implemented sections for About, Skills, Experience, Projects, Blog, Testimonials, CV, and Contact form; integrated EmailJS to receive contact directly via the form.

	<ul style="list-style-type: none"> -Built-in functionality to download CVs as PDF (html2pdf.js), sitemap, structured data (JSON-LD), and PWA manifest to improve search and mobile experience. -Applied Framer Motion, GSAP, and tsparticles for animations, scroll progress, dynamic backgrounds, and responsive layout; monitored Web Vitals in production.
Technologies used	Next.js 15, React 19, TypeScript, Tailwind CSS, Framer Motion, GSAP, EmailJS, html2pdf.js, tsparticles, Web Vitals

PAYSPLIT

Project Description	PaySplit – An app for splitting bills and managing group payments.
Position	Full-stack Developer
Team size	1 members (Personal project)
Responsibility	<ul style="list-style-type: none"> -Designed and implemented full-stack architecture: React Native (Expo) mobile app and Node.js/Express REST API with MongoDB. -Built JWT-based authentication, role-based access control (Admin/User), and security measures (bcrypt, Helmet, rate limiting, input validation). -Developed payment request lifecycle (create, send, track) with even-split logic and MoMo integration (QR code, deep link, copy-to-pay). -Integrated Socket.IO for real-time notifications (new payment requests, payment received). -Designed UI/UX for Admin/User dashboards, login/register flows, payment popups, and custom alert system; supported dark/light theme. -Structured frontend services (API, auth, payment, user), AuthContext, and shared types; established consistent error handling and backend layering.
Technologies used	<p>Frontend: React Native, Expo, TypeScript, Expo Router, React Navigation, AsyncStorage, react-native-qr-code-svg, react-native-reanimated</p> <p>Backend: Node.js, Express, MongoDB, Mongoose, Socket.IO, JWT, bcrypt, Helmet, express-validator, express-rate-limit</p> <p>Tools: Git, ESLint, Prettier</p>
